## Deregulation

Justin Williams

Chairman Williams,

The time has come for SC to allow electric competition i.e. deregulation. I know sir, it's a scary word and there are horror stories however for the ratepayers it affords them an opportunity to purchase energy at a lower cost. Take a look at my former home

state, Pennsylvania and how they did it. The program they created works and has been successful. Personally sir, I am not happy paying \$.13 cents a KWH when I use to pay \$.046 cents. When you look at the commercial & industrial electric markets the savings for SC businesses would be tremendous.

Thank you for your time and your service to us ratepayers here in SC and remember this, Dominion is not your friend. Their actions have hurt many and have given the energy industry a bad name.

Bill
